DETAILED ACTION

Claims 1-64 are pending in this application.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 17-29, 48-52, 58 and 59, drawn to a nutraceutical composition, process of making and method of use, classified in class 424, subclass 400.
- II. Claims 12-16 and 30-43, drawn to a food or beverage, classified in class 426, subclass 425.
- III. Claims 44-47, drawn to enhancing nutritional value of food or beverage, classified in class 424, subclass 439.
- IV. Claims 53-56, drawn to composition suitable for application to human skin, classified in class 424, subclass 59.
- V. Claim 57, drawn to making an enriched nutraceutical composition, classified in class 424, subclass 439.
- VI. Claims 60-64, drawn to making a polyphenol-containing nutraceutical, classified in class 424, subclass 439.

The inventions are distinct, each from the other because:

Inventions I and II, III, IV, V, VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case group I is different from the other groups because group I is

Art Unit: 1616

directed to a composition which may have any form not necessarily a food or beverage, whereas groups II and III are directed to specifically a food or beverage compositions. Group IV is directed towards a topical composition and preventing sunburn. Group V is directed to a making an enriched nutraceutical composition, which is a different process than the process in group I. Finally, group VI is a method of extracting polyphenols from coffee cherry and administering the extract with an agent suitable for human consumption, which is essentially different from any of the previous processes. Further, group I has separate utility as a skin conditioner and group II does not require the edible carrier of group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
